out for  
Christmas**

Four in five (80%) Christmas, a clergyman has compiled a Biblical address not in traditional English or Latin.

Jorge's Road was named for the highway by 44-year-old Peter Cassidini, pastor of St. Mary's United First Church, near 1900.

His Symposium has been put to rest both at church youth groups and during a Sunday service. Following was a bus ride to the museum.

One who might dispute questions about the paradise and in the other, called The Last Sheep, players had to round up the flock.

In Jonker Road, which costs 13.75 from March and runs on the 400 model, the player has to

1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 26

## Decision soon on "ITV micro"

TV companies were meeting this week to decide their future paths, as television programmers — and an onslaught from some of the companies that independent TV should produce its own rival to the BBC — were

Reporters had claimed ITN had rolled its entire founder program to produce a 1400 company with 14,000 units of B-400, the new 2000 program, 44,000 units of B-400, and 44,000 units of B-400.

## 24 PAGES OF SPECTRUM BEST

Send 50p stamp to:  
Spectrum Publications,  
87 Watlington Lane,  
London W8 7TS 1983

Tapeart has brought out a Orionson machine code monitor, which includes an assembler and disassembler. Other features are printer and monitor handling, flags, flow control, run, and breakpoint. The package comes with a 30-page user guide.  
Price: £33

Tapeart, *Discs 1 and 2*, Tiverton Park, Newmarket Road, Cambridge

Melbourne House has now taken over publishing rights in AtariSoft Forth. Programs in AtariSoft Forth are said to run 10-15 times faster than BASIC programs, without the need to store machine code. Price: £14.95

Melbourne House, 32M Studio Drive, Tollymore Park, Mablethorpe, Lincoln

Fidelity has moved into the home computer market with a 34-inch colour monitor which it says will work with virtually any computer or game machine. It will accept a range of inputs, including RGB, S-VHS or composite video, plus audio, via a 21-pin scan type socket. It costs £200

Fidelity, 1a Grove Road, London NW10 6AD

Toscan from Nintendo isn't a business program — it's a game where you go on a catch-the-ball as possible while avoiding obstacles, enemy ships. Also out from Nintendo is Hypercopter which gives you a plane, to use over enemies from 20 various dark games on, for the Commodore 64 and also £5.95

Toscan, 88 Cuddington Way, Middlesbrough, Teeside, TS20 2SD

Film Fan, the people who brought you the *Film Photographer's Handbook*, comes The Personal Computer Handbook. Covering £5.95 in paperback and £8.95 in hardback, it has chapters on the elements of a microcomputer system, how your money works, living with computers, the electronic home, the electronic office, and computers in the future. A glossary and buyer's guide already slightly over 50 is included

Film Books, Cavaye Place, London SW10 9PG

## Fun in a bun

Games software finds that a soft-waxed idea from the States for its hefty new game *Mc Woppy*.

According to Ocean's *Mc Donald's Word!* is the States, all computer games. From *McDonald's* to *Kool-Aid* and *Coke-Cola* have been put into a computer game. The material owners regard it as good products. But it's still a new idea here.

Ocean's game includes the Whoppy logo and advertising angle. The player has to help Mc Whoppy make hamburgers, while avoiding all *McDonald's* the burger thief and kitchen items like *Big Mac* and *Soft-Six* with a popper gun. It costs \$3.95 for the IBM Spectrum.

*David W. Arnold*, "As time, we thought we were going to have a pay Whoppy is really the thing. (McDonald's like where this was the finished product, this failed a so much that they said we could use the name 'Pop', because it would be good advertising for them. And I think it will be, because the game is already selling fantastically well."

Whoppy, even plans to sell the game on its hamburger shops or at Christmas.

New Ocean is following up *Mc Whoppy* with other games based on famous brands.

It has just launched *Real*

*Brickade*, a golf simulation based on the well-known *Scoutport* golf course, which was drawn well with its club members themselves.

"They were there in their blazers with gold buttons, waiting away in the Spectrum keyboard," *David Word* recalled.

And Ocean is anticipating with two other well-known companies to launch programs along the same line early in the new year.

*Ocean High Building, Southview Drive, Macclesfield SK10 3PQ*

**Mc Whoppy** — the hero of Ocean's new computer game

## Briefly

House of Death is a new game for the C64, in a follow-up from *Samurai* at its Zedder adventure. A first adventure costing £19.95. House of Death takes place in a dream film set where a man will. Death is a word and other unpleasant characters in no way was leaving. *Delirious House* is a space shoot 'em up game in 1998. Both games are for the C64, and are from *Taurus*.

*Samurai* (last p. 1) *Delirious House* (last p. 1) *Samurai* (last p. 1) *Delirious House* (last p. 1)

Five new games from *Abacus*. *Protons*, *Firebirds*, *Masters*, *Minors*, *Calculus*, *Warrior*, and *Super Digger*. All the games cost £19.95 each, including a second *BAK* magazine on the B side. *Protons* and *Firebirds* are also sold along with *Abacus's* *Samurai* and *Delirious House* at a £19.95 price pack.

*Abacus*, 778 *Leamington Road*, *Leamington*. Tel: 01922 5811.

*Soft Shop* is the name of a new another new chain of software shops, which will be opening up all over the Home Counties over the next few months. The first

shop opened at *Chalfont St Giles* in November. There is a lot of shops in stock a wide range of software and accessories for different machines. There will be an extension, and computers will be encouraged to be programs on it for the first time they buy.

*Soft Shop*, 40 Church Hill, *Chalfont St Giles*.

*Smiths* will now be stocking the *AMS* 3 inch disk drive for the BBC, using. The drive is available in a single 1986 format at £120 or a 1988 format at £194, and runs off the BBC power supply.

*AMS*, *Microbus Technology*, *Crane Lane*, *Apples*, *Warrington*, *Cheshire*.

*Deutsche* has launched *Home Player* to do a number of home programs, for the Commodore 64 or Amiga plus disk. You can use the screen for a home music using *Home Player* command which the computer translates into code. The program comes with a demo of a home drive, and costs £39.95.

*Deutsche*, *Rue de Commerce*, *Boulevard*, *St Paul*, *Paris*, *France*, *France*.

# Your micro can put on a slide show

More than 2000 slides about a new and exciting program available for the VIC 20 and Commodore 64. It is called *Slide Show*, and it can be used to show the computer in just a few minutes. It is a new and exciting program available for the VIC 20 and Commodore 64.

Using the graphics card, you can show slides on the screen which are then shown. The graphics card, you can show slides on the screen which are then shown. The graphics card, you can show slides on the screen which are then shown.

The maximum number of pages available depends upon the version of the program. For example, the VIC 20 version has 12 to 100 pages, each page being 10 characters by 10 characters. The Commodore 64 version has 12 to 100 pages, each page being 10 characters by 10 characters. The Commodore 64 version has 12 to 100 pages, each page being 10 characters by 10 characters.

Free: £1,000 worth of new

MOGUL

software must be won

**JUST** find the words and a share of £1,000 worth of software must be yours.

We have got together with Mogul, the new house wordsearch software for the word computerists.

The 46-episode word search is a great package of tapes worth about £22 for those of the more popular word-puzzle — the Spectrum, BBC 2 and Commodore 64.

Mogul features a choice of video-cassette Mogul Computerists, which is shown in November with both 12- and 15-episode sets of tapes produced in Britain.

#### How to enter

The word square below contains the names of a number of Mogul software titles. They are arranged horizontally and diagonally.

All you have to do is mark them clearly in the word square, including your complete — and full name, address, phone number — and the number of tapes you want.

All that left is to appear, plus several more, are at the list:

**Microcomputer**    **The Computer**  
**Brain**                    **Range King**  
**Creative's Revenge**    **Kong Kong**  
**Super Trek**            **Kidspoke**  
**The Game**            **Plywood**  
**Adventure Park**      **Public eye**  
**Party Planner**        **Crash**  
**Easy Vegas**           **Acquainted**  
                             **Master Suite**

While you have completed the word square and the complete set around the feature lines, and marked the searched tape on an envelope addressed to Mogul Software Company, Home Computing World, No. 1 Golden Square, London W1R 3AB.

This is not the address from close of business on December 18.

**Important:** You must show us on the back of the envelope the number of software titles you want. Any without this will be discarded.

Entries close in first post on Friday, December 30.

You may enter as many times as you wish, provided each is on the original word square and complete set, and you have a separate envelope.

The winners will be the first 46 letters entered, regardless of which of the word computerists have been marked on the envelope.

The winners and the names of the winners will appear on the first page of Home Computing World, and the prize will arrive from Mogul within 28 days of this issue.

**Are you good with words? See how many Mogul titles you can find in our word square and you could be among our 46 winners of great new software**

#### The rules

The first 46 persons whose names will win the prize. Entries which are not fully completed and complete within the number of letters entered on the back, will not be considered.

Entries close in first post on Friday, December 30, 1983.

Entries will not be accepted from winners of Apple Specialist, Posh, 1000 Mogul and Adventure Planner 4.0. This restriction also applies to winners of Challenge and again of the computer.

The winners' names and the software will appear in Home Computing World. The winners' names to find and no correspondence will be entered via.

# Once you've got to grips with the Rock 'n' Roll game, flip-over and get your teeth into Dracula.

New K-tel Doublesiders are great fun and great value which ever way round you look at them.

For only £6.95 you don't just get one top quality computer game, you get two.

When you've finished playing one side simply flip it over (just like a music cassette) and move off on a second totally different, equally gripping game.

Take your choice. Already there are five Doublesiders to choose

**▶ It's Only Rock 'n' Roll** Can you become a superstar? A Rock 'n' Roll star? Or are you just another has-been?

You've got a lot of money, a lot of money and a great future! But can you stay the course, stand the heart-breaking disappointments, flunk, scolded, even worse? Can you capture the hearts and willies of the public and become a Rock 'n' Roll star?

**▶ Freaky Of Dracula** Darkness is falling... The vampires are hungry... You can't go back... Your only chance of survival lies ahead!

The walls are cold and clammy. With each step you remember the horrors (dark, ghastly, monstrous and just of shocking horror! In your hand you have the most secret weapon with which to defend yourself! Dare you face the ultimate evil... and win.

from — three suitable for the ZX Spectrum and two for the Commodore Vic 20 — and there are more to come.

So hurry to the shops now and see for yourself how K-tel Doublesiders really do give you twice the fun with two on one.

## K-TEL DOUBLESIDERS

Each  
£6.95  
each

Twice the fun with two on one.

## Here's how to ease the shock of those bills

Do you find your power bills difficult to believe? Now you can check them — and get the best price around.

My program, for the Dragon 12, works out gas and electricity bills and all you have to do is to follow the program.

You will be presented with a series of three choice gas, clearance at end of program

The first is gas. Straightforward but gas bill calculations are slightly more complex. Gas companies do so the simplest way, in which their bills are calculated.

In the south-west region, variable  $\phi$  will be 20g expanding charge per month, less other areas.

Look on your gas bill and divide the standing charge by the number of weeks elapsed since the last reading.

**Prepare for the worst with A. Lee-Bentley's program for the Dragon. It will work out your gas and electricity bills before the buff envelopes arrive.**

# We've got the Aquarius taped!

Now for the first time you can buy cassette based software for your Aquarius. All the excitement of arcade type action at the low, low price of **£5.95.**

## N-Vaders

The classic space golden-age but with a modern twist for fast moving action. Pilot your ship and shoot against backgrounds of coloured worlds. Shoot them all down the sky - but beware, they get faster and meaner!

## Ed-on

Put the dots and connect the planets (dots) through. An updated version of the addictive arcade game. Accelerate, decelerate, stop and change lanes. If you change to red, the reaction eye go on to higher things.

## JUST RELEASED Phrogger

A super hit of an earlier version, we create quality games without missing graphics. Move fast and jump across all the dangers and perils. Take your life in your controls to reach safety.

## Aliens

We use one of the ultimate graphics selected by your unique address and blend. Probe the mysteries of the post-apocalyptic. Enter the secret of the unknown and you the danger through to survive and the pleasure to win!

## Chuckman

Based on the most popular arcade game with some extra. And the Chuckman put out the moves and make the time limits to win the play. The player has plenty of obstacles, you'll rock along and pieces of mind.

# Turning turtle

**Turtle graphics — without a Super Expander? Alan Wilburn explains how it can be done — and on any VIC-20 with 3K or 8K memory expansion**

The lack of the necessary graphics commands and the use of a Super Expander notwithstanding, this program is able to allow high resolution drawing on the VIC-20. Before starting to write the program, I decided to meet two requirements:

Firstly, the program had to draw simple shapes using a minimum of commands with the exception of an exit of run. Secondly, the program had to be compatible with both 3K and 8K memory expansion.

The first requirement was easily met by using the turtle technique. This is an imaginary pen that can be moved around the screen with two simple commands — turn (X) and draw (Y). By repeatedly using these commands, complex shapes could easily be programmed.

As first, the second requirement seemed harder to meet. The high resolution screen uses most of the user RAM from 51200 to 61440, so storing the program in the 3K expansion area would have made it inaccessible to machines with only 1K expansion and vice versa.

The solution was to reduce the size of the high resolution screen and move the VIC20 screen just below the normal screen location from 51200 to 51020, making it accessible to VICs with either 3K or 8K expansion (see Figure 1).

The program itself occupies four screen commands to VIC BASIC. Listed below is a brief description of each command.

**VICPEN** switches on the high resolution screen and points the pen upwards ready to draw.

**PEN X,Y** (X = 0 to 159 Y = 0 to 159) moves the start position for the draw command and can also be used to plot an individual point.

**TURN (X)** (X = 0 to 159) rotates the pen through X degrees from its current direction. Current angles less than 25° can be programmed by using the command twice, ie, **TURN 60; TURN 60** = 120°.

**TURN 60** rotates the pen to the 45° direction from any direction.

**DRAW (X)** draws a line of length (X) in the direction determined by the command **TURN (X)**. The value of X defaults to screen lines (15) and 0FF.

Consider the Demo 1 program along with its graphical representation in Figure 2.

The start co-ordinates of the pen are stored in addresses 571 and 572 by the command **PEN 78,80**. The turn routine rotates the 45° angle 45 radians and stores the result in the floating point store. The Sine and Cosine of the angle are then calculated and also stored as floating point numbers.

The results of these calculations

produce the efforts X1 and Y1 which when added to the current X and Y values produce the new position of the pen.

The draw routine merely adds the value of the efforts X1 and Y1 to the X and Y values in many times as determined by the command **DRAW (X)**.

After drawing the program, it should be saved before it is run as any error may hang up the computer. The program will run on any expanded VIC.

However, if more than 3K expansion is fitted, then the VIC should be reconfigured by **POKE 642,32 POKE 644,39 577554432** before loading and then run lines 10 and 20.

(Demo 2 and Demo 3 are two short routines which demonstrate

how the commands are used to draw simple shapes. Line 103 prevents the BASIC message from corrupting the display. Pressing any key will return the VIC screen to normal.)

**Graphical representation of Demo 1**

**Demo 1** draws a line from center of screen at an angle of 45°

```
10 VICPEN
20 PEN 78,80
30 TURN 45
40 DRAW 150
50 Y1=Y1+Y1
60 Y1=Y1-Y1
```

**Demo 2** draws a line from center of screen at an angle of 45°

```
10 VICPEN
20 PEN 78,80
30 TURN 45
40 DRAW 150
```

The high resolution screen consists of 132 x 144 possible points where X = 0 to 131 and Y = 0 to 139.

# Home Computing WEEKLY

## COME AND JOIN US

We are looking for an enthusiastic journalist to join Britain's brightest computer magazine. An interest in, and a knowledge of, home computers would be a decided advantage, but is not essential. However, an ability to write accurately and under pressure must definitely be!

We would imagine that the successful applicant has already had magazine experience and is presently looking to advance further career. If you know otherwise, we are open to persuasion! A competitive salary, which is negotiable, will be paid.

Apply with full C.V. to: Paul Lippert, Home Computing Weekly,  
143 Charing Cross Rd, London WC2H 8LL.  
All applications treated in strictest confidence.

# AGF

## PROGRAMMABLE JOYSTICK INTERFACE for Spectrum or ZX81

**NOW  
AVAILABLE  
from  
SELECTED  
RETAILERS**

**ONLY  
33.95  
+P&P**

### PROGRAMMABLE INTERFACE

The AGF Programmable Joystick Interface is a unique design offering the use of one AGF complete joystick with absolutely direct wiring, which is a contrast to 8088 port chips, with the limited Spectrum or ZX81.

The hardware gives flexible software access to additional software and accurately replicates the logic of the computer in a manner which is transparent to joystick A/D, key reading methods, host driver and Master Code.

The interface does not interfere with key operation and can therefore be used simultaneously with the keyboard.

There is no need to access the interface once fitted as the rear extension connector will automatically further expansion. It operates as 8088 push out. This important feature would exclude most of the expansion port.

The key replication principle followed by AGF means that post-own programs can use any additional joystick expansion by adding simple key mapping BASIC.

Two joystick models are provided which share the same logic, but use with the capacity of two player games. Several adaptations may be used on the same computer for multiple joystick applications.

The interface is supported by a two-part code, which is loaded up on a programming board supplied. The code directs and logic routines. The two programs are then selected as a set of code which are mapped onto approximately numbered slots on the interface.

Once installed this can be started up a quick reference programming card for moving into new games. As the programming is very precise dependent on the interface which the key configuration made and can be immediately used when first reached on.

### KEY FEATURES

- Programmable design gives TOTAL software support
- Accepts Atari, Commodore Pro, Neo, Starlight, Quick Mini, Le 5000 etc.
- Rear extension connector for all other add-ons.
- Free design program and instructions.

### PACKAGE CONTENTS SUPPLIED

- Programmable Interface Module in standard, complete with option program code book.
- Self written programming sheet detailing how to setup which key is connected to J1, J2, J3, J4, J5, J6, J7, J8, J9, J10, J11, J12, J13, J14, J15, J16, J17, J18, J19, J20, J21, J22, J23, J24, J25, J26, J27, J28, J29, J30, J31, J32, J33, J34, J35, J36, J37, J38, J39, J40, J41, J42, J43, J44, J45, J46, J47, J48, J49, J50, J51, J52, J53, J54, J55, J56, J57, J58, J59, J60, J61, J62, J63, J64, J65, J66, J67, J68, J69, J70, J71, J72, J73, J74, J75, J76, J77, J78, J79, J80, J81, J82, J83, J84, J85, J86, J87, J88, J89, J90, J91, J92, J93, J94, J95, J96, J97, J98, J99, J100, J101, J102, J103, J104, # Alien encounters

Our reviewers guide you through some software encounters of the cosmic kind

## Cylon Attack 32K BBC £7.90

A&F, 103 Hyde Road, Gorse, Walsbyrie M10 1AP

The term "state of the art" is much overused in computing, and you should rarely let it suggest what is new without thought.

Leave things for a while before deciding to describe this

game as one of the pioneering. My reasons for giving it such an accolade are mainly the fairly a commendable idea. There's even some a better thought on, and decent game — not as likely to get such an original idea for some time to come.

The aim of the game is the elimination of various types of alien. I've found this before you say, but well.

The effect appears to be good, but the mathematics of the

## Altimaia Commodore 64 plus joystick £6.95

Virgil Games, 41 Portobello Road, London W11

This game is topless

The mysterious realm on Altimaia lives through the Commodore 64 and other such machines. The great world is nothing to start with, and it's a pity, a tiny little broken, opened from the top of the screen, showing down the screen.

The action is a bit more "mystery" than most, but the game is not as good as the others.

The sound is fairly good, and the graphics are somewhat better than most.

After that, the game is not as good as the others.

sample

The structure of the game is not as good as the others, but the game is not as good as the others.

With its fairly, packaging and other, the game is not as good as the others.

With its fairly, packaging and other, the game is not as good as the others.

## Brain Damage Spectrum £5.95

Salvatory, London House, 270/271 Reg St, London W6

Brain Damage is a rather good game, similar to the "Brain" level in the game "Brain".

You have to remember around 100,000 of them, and you have to remember around 100,000 of them.

The game is a bit more "mystery" than most, but the game is not as good as the others.

The game is a bit more "mystery" than most, but the game is not as good as the others.

Flizbuzz is a simple game which tests your mental agility.

All you have to do is to count from 1 to 100, rather rapidly. Three sounds, very strongly, but really quiet, you count to a number that contains a 5 or is divisible by 5 (such as 25 or 50) you must say "flizbuzz".

And each number that contains a 7 or is divisible by 7 you replace with "buz".

If a number qualifies for both "buz" and "flizbuzz", then you say "flizbuz".

The program, which is written in ZX81 BASIC, keeps track of the score, but doesn't give you long to think.

So RUN the program, press NEW LINE to start, and if you want your score to be a number, press 1. If you want fliz, press 3, buzz 3, and flizbuzz 4.

If all is well, the program gives you answers, and goes on. If not, you get two asterisks, the right answer, and straight on to the next go.

If you are really good, you can shorten the response time to less than 370. Or if you get in a complete tangle, you can allow yourself longer.

When you are getting on top of 5 and 7 you can change them, try replacing 5 with 3 or lines 26, 410 and 440.

# How quickly can you think?

Ever played the party game Flizbuzz? Now Peter Scott has written a version that you can play against your ZX81

## Main variables

- 50 score (the current number & the score)
- 42 the answer suggested by the player
- 41 number, used in calculations whether it is used in division by, or contains, 5 or 7
- 2 display
- 5, 7 number & letter a number is divisible by, or contains, 5 or 7

## How it works

- 10-100 gives instructions, and gives the rule
- 110-130 initialise the variables
- 140-148 calculates whether the number is divisible by, or contains, 5 or 7 by using instructions 440 and 500. The result is stored in 2, 1 for number, 3 for 5, 4 for 7, and 4 for both.
- 170-200 tests the player's input, and displays whether it is correct. It prints two asterisks if not.
- 210-230 keeps the score, and prints the current answer
- 240-250 increments 41 by one, checks for the end of the game, and replaces 50 with 10.
- 400-440 is a subprogram which checks whether 41 is divisible by, or contains, 5
- 500-550 does the same for 7
- 600 prints the score out of 100

0 4 3 4 5 0 2 5 7 3 8 4 1 6 2  
9 2 7 9 5 9 7 5 3 6 4 2 9 2  
4 2 5 8 2 2 5 4 5 0 2 9 2  
0 5 8 2 2 5 8 8 6 5 2 4 3

# This is the dawning of the age of Aquarius – and your computer christmas.

**The Aquarius basic computer – only £49.95**  
8K ROM, 4K RAM User expandable to 32K, full 49 keys, 16 colours, built-in Microsoft BASIC, sound channel

**The Aquarius data computer – only £159.95**  
The Data Recorder lets you load programs and data from the cassette tape and back again

**The Aquarius expanded computer – only £44.95**

The Mini-expander adds two joy-sticks, two cartridge ports, two-ear sound channels and of course simultaneous use of software and memory cartridges

**The Aquarius computer system – only £379.95**

8K ROM, 4K RAM User expandable to 32K, full 49 key moving keyboard, built-in Microsoft BASIC, 28K Microprocessor based, 2 joystick, 2 cartridge ports, 3-channel sound, data recorder, Plus Printer to provide permanent record of screen content, graphics and upper + lower case letters. Prints 80 characters per record, 42 cols in width

## DO YOU WANT TO PLAY GAMES?

**Chess**  
Play 64 computerised moves

**Musical Game**  
All the best 'Tape Recorder' tunes

**Maze**  
Collect and deliver your way

**Burger Time**  
Make burgers, serve helpings

**Strike Wally**  
Take the Wallys out with a bang

**Adventure**  
Discover the secrets of the dragons

**Rogue**  
Defeat the dragon and his minions

**Laser Maze**  
Use the laser to solve the maze

**World of Wonders**  
Bring back nature, restore the world

# HAVE YOU BEEN INVOLVED IN A MYSTERIOUS ADVENTURE RECENTLY?

If so, it is quite possible that you are presently suffering from TMA, more commonly known as Total Involvement Syndrome.

TMA manifests itself in a number of ways. Unusually mild symptoms include a victim's complete inability to feel at ease in the world outside. Other symptoms include inability to concentrate, loss of interest in other people, and an overwhelming sense of isolation and emptiness.

Experts believe that TMA is usually contracted as a result of involvement with Mysterious Adventures, the most commonly cited by naming any of the following items contained:

48K SPECTRUM, 48K MODEL 400 II, TRANS, COLOUR GENIE, AFAN 48000, COMBATERS OF SHADOW II, THE 2201, LYNN etc.

When questioned about this epidemic, a representative of DIGITAL FANTASIA, a computer firm actively engaged in research and development work in Mysterious Adventures, said, "There is probably no cure for TMA other than, erms, isolate, deny, deny, deny etc. which has been seen only a few very seldom". In the absence of a more permanent cure, I would advise you continue to submit to the game, and observe Mysterious Adventures from any source not mentioned above. TMA is highly contagious and in order to prevent its further spread, I would urge you to play on CD, rather than on tape."

If you cannot stop playing Computer Combat, or AFAN 48000, or the 2201, or Dragon II, you may obtain Mysterious Adventures from any of the following outlets:

1. THE WILLOW WAGON  
2. THE KING MACHINE  
3. SHADOWS OF SHANTAR II  
4. SHADOWS OF SHANTAR II

5. AFAN 48000  
6. AFAN 48000  
7. AFAN 48000

8. THE WILLOW WAGON  
9. THE WILLOW WAGON  
10. THE WILLOW WAGON

Remember, once you have F.A.T. and Postage Stamp, you are safe. Discounts are available off cash.

It is advised that you purchase MYSTERIOUS ADVENTURES EARLY TO AVOID YOUR SENSE OF REALITY.

# Mysterious Adventures

## WHAT ARE MYSTERIOUS ADVENTURES?

**MYSTERIOUS** (Adjective) = "Dazzling, full of mystery, strange or unaccountable"

**ADVENTURE** (Noun) = "An enterprise full of risk or danger; an experience of unknown events challenging the participants life, a gamble on failure or success"

To start play on a **MYSTERIOUS ADVENTURE** is to take a step out of the world of reality and into the world of dreams. Your computer is your guide on these fantastic journeys in time and space where danger is ever present and solutions to problems seldom come easy.

By typing in simple commands in plain English you can "talk" to your computerised guide and tell it what your next actions are to be.

**MYSTERIOUS ADVENTURES** bring a frightening reality to the virtual situations in which you will find yourself. You will become involved in these strange worlds of the imagination, you will feel danger when things seem to be moving against you, you will feel elated when you overcome obstacles that are set in your way. Eventually you will feel surprised as you reach the climax of your adventure, find treasure or goals.

Any **MYSTERIOUS ADVENTURE** is not a mission to be taken lightly, success will not be certain - just as Rome was not built in a day - so each Adventure can rarely be completed in one session. To this end a "SAVE GAME" feature has been incorporated in each of the Adventures. This means that at any time in their during play of an Adventure you can store on tape your precise whereabouts, your equipment record, and any other pertinent details about your present status.

## NEW DEVELOPMENTS ON MYSTERIOUS ADVENTURES

Over the past few years, Adventure programs on Computers have almost always been presented in the classic "Text only" mode. For most Adventure players, this has indeed been due to a) the order to play Adventures. The mental imagery generated by such an approach is limited only by the player's own imagination. One of the main reasons for the "Text only" approach has been the lack of funds or capabilities with regard to Graphics resolution - Personal Adventures could at best be only very limited in scope.

This situation is changing now however, and Brian Howarth, creator of the **MYSTERIOUS ADVENTURES** series, has spent many hours incorporating Graphics from the Adventures. The working in close conjunction with Don Black as a professional Artist, Brian has produced a series of extremely vivid and imaginative Adventures. Each **MYSTERIOUS ADVENTURE** now features, in addition to the Text description, pictorial "views" of your current location and surroundings. As you enter each new location, a high resolution, colour picture is specially drawn. The effect of this is to bring new realism to the Scenario, you can actually see the situation you are faced with and act accordingly. It must be stressed that each picture has been designed so that it will enhance, rather than conflict with your mental imagery. As the single stroke of a key you can erase the picture and turn on with your Adventure as text only if that is your preference. We are confident that no other Adventure programs can boast such fascinating realism and imagination combined with the flexibility and ease of play that have made **MYSTERIOUS ADVENTURES** such a phenomenal, a reliable success.

In addition the Adventures now feature full voice recording on cassette. These mean that you are no longer restricted to repeating single or two word commands. You can now type in whole sentences in more or less plain English. Your computer will quickly analyse the sentence and perform a whole string of your commands - just another feature designed to increase your enjoyment of these world leading games!

The "New style" **MYSTERIOUS ADVENTURES** are currently available for the 48K SPECTRUM COMMUNIQUE 64. More versions are planned than ever which will include DRAGON 32, ORIC 1, APPLE II & 3e, ATARI, DYWK, MACTEL, AQUARIUS 128K PC etc. Please write or phone for availability.

# PLAY ALL DAY WITH THE LATEST AND GREATEST SOFTWARE TO BE SEEN ON SCREEN!

**PLAY ALL DAY!**  
 JANUARY 6th 7th 8th

January 6th-8th (Fri-Sat-Sun) and disc  
 titles which are not played  
 on the very latest in software  
 on the very best computers, including  
 Apple, VisiCalc, VisiDraw, VisiPaint,  
 etc. (approx. £100 to £150) will be  
 displayed. The London Home Computer Show  
 will also be the first to see the latest and  
 finest software, with some of the best from  
 the UK.

Play all day, try out all the software at the greatest

## THE LONDON HOME COMPUTER SHOW

HORTICULTURAL SOCIETY'S NEW HALL, WESTMINSTER

# All that's new at the Microfair

Once again, we bring you the first full report of the latest ZX Microfair. Paul Liptrot went there

Inside Thutlith's dream of what the characters look like once adventure begins. (Inside Through the Looking Glass)

A nice computer setup, from Young and Janssen keeps all your computers yearning

John Johnston, proprietor of (Spectrum), stands with a clean up at the counter with his Microfair program

Ann Galloway, 25, with the latest from the Looking Glass

Little Markings, "rebranded" and author of Hippo, with daughters Mary Ann and Carol Lynn

IT WAS a more relaxed Microfair this time because organizer Mike Johnston had extended it to two days.

So, although more than 11,000 people attended there was room to move in the aisles — unlike last year when 13,000 attended the one-day event.

It was held at North London's Alexandra Pavilion, which will also be the venue for the next Microfair on February 4.

There was lots of new software and a selection of new add-on plastic accessories that in earlier times.

The last two prompted software house CML to abandon its boxed sets.

Managing Director Clive Chambers said there was no point in saying when visitors were selling the same software as the market requires and, in some cases, undermining prices.

But Mr Johnston, who is also secretary of the Guild of Software Dealers, said he was not going to finance who took stands, provided the shows offered the widest possible selection of add-on and software.

In fact, he said, visitors could extend the range of software on show by displaying products from companies without stands.

"I would have liked him to have stayed until he found out some people will have been disappointed. And if he can't see the need."

A trouble but then it seemed called Brady's words surprised for the first arcade game from Currell, the software company best known for its adventure.

The Adventures of 16 Forward, priced at £5.95 for the Spectrum, is based on director Stuart Galloway's dog. He said: "Brady gave me the idea. He's as fast as two men plus."

In the game, programmed by Stephen Clark, you guide Brady past wolves, pools with ravenous crocodiles and during progress to recover lost masters from the last of the evil wizards.

Currell also launched The Crabs (£4.95, Spectrum) by co-director Ray Currell, who wrote most of Currell's other adventures. Two more which contain the same set but were missing.

Great Through the Looking Glass, a Spectrum adventure at £5.95, bears the warning "Not recommended for children under 10."

It is based on an old Prince Maurice's husband and features figures like Ben Lysaght, Norman Telford, Mary Whitehouse, Terry Bone and the Pope with Dennis Skinner, notable MP for Rochester, as the guide.

Apprentices' Roger Taylor explained "There are a couple of

hardly less when he gets to Soko but you will never miss it if you've got a dirty mind."

PSL showed a new light pen from Teague designer Geoff Jones. Priced at £17.25 for the Spectrum, it can draw on its screen with a selection of eight colours and screen can be wiped from and loaded to the screen.

The company also had a new Address game by 17-year-old Paul Raynolds. Priced at £2.95, Spectrum is a pure arcade, part strategy in which you have to stop a rocket being sent. If you fail you must come tomorrow by helicopter.

Which brought on Microdrive versions of Pascal (£25) and Demos (£24), an assembly/disassembly. More comprehensive versions are planned for next month and Hawk also making better use of the new disk.

CML also showed £5.95 game for the Spectrum: Magic Mammals, an arcade game which takes place underground, and Spectrum Tactics, in which three men command an on island base to battle for food and base.

The YDVO computer disk drive was on display by Young and Janssen. Priced at £24.95 — with £9.95 for optional storage box — it is supplied packed flat to be set and black painted metal. It holds computer tape sets, TV, disc drives with power supply and cables kept out of sight.

Derek Harwood's ZX81 FORTH ROM with multi-tasking replaces the ZX81's BASIC ROM and comes as a three-part set: FORTH, with manual, is £25. It needs memory expansion and will work with 128, 256 or 512 RAM chips.

Mr Harwood says the FORTH is quicker than FORTH in most applications, being a complete discrete language which does not use the traditional micro-processor approach.

ZX81 FORTH needed FORTH standards, but not FORTH words due to lack of memory. It contained some non-standard words for multi-tasking — up to 10 in a case which can be scheduled to execute from 30 times a second to once a year.

Brady covered ZX81s and available.

Mike-Gee launched 15 new titles, being its range up to £2. Among them Mad Maths II, a sequel to its top-seller featuring a box packed with Mad Maths II, the Professor, which involves collecting pencils for a mad man, was good for children because "Mad Maths kills anything."

Both cost £2.95.

A partnership of three teenagers, calling themselves Rap-

## SHOW REPORT

user, showed their first product, an arcade game with the Nintendo controlling system of *Excavator* (Spectrum, £1.95). But when Neil Macdon, 15, said "It's not the same as *Excavator*," The game-making, Tim Macdon (Neil's brother), David Cowell and Tim Lake, plus more software for the Spectrum and the BBC, were.

Add the Macdonas showed two new 15 Spectrum games: *Chameleon*, a chess game featuring boards and pawns, and a space fighter game called *80-90 War*.

Master Tool Kit (£19.95) from OCP, adds new features to the Spectrum, including tape and disc transfer, trace, clock and alarm, dollar/cent, string search and substitute, 10 user defined keys and a separate character printer.

Masterware gave games were brought out by disk/locality — 12 for the Spectrum, five for the Commodore 64 and two for the VIC-20.

*Quake* has Ultravox 44, which turns the Commodore 64 into a music synthesizer for £14.95 and a version of its popular *Mardi Cat* for the Electron (£8.95).

New versions of Spectrum programs, both coming £9.95, were shown by two separate companies — an adjoining stand both parents, change onto the keyboard and depress the color keys and are produced by E.I.C. and Green Design.

Artie had Earth Defense, in which you save a city from nuclear devastation, and the self-explanatory *Jeopardy*, both at £5.95 for the Spectrum.

The company also presented a ladder game called *Ben Dover* in which your Teddy bear has to crawl the better bear. Designed by a brother, it was written by 21-year-old Ian Ransom.

Giblet presented four new adventures over months, all written with no program called *The Quest*, which enables machine made adventures to be written without a knowledge of machine code.

A new joystick interface from Ego Electronics (£28.95) consists of a C6400 RAA, powered by a waste-chips battery, which can save the mouse of 15 games and the keyboard double for up to three months. It can also be used as a joystick £10.95 for regular use and can also. The plugs into last isogen Atari-type nine-pin joystick.

Warwick showed three new arcade games at £5.95 — *Power Bear*, *Robot Bear* and *Sun Snake*.

De-France (£25.95, Spectrum) from Redwood and another boy in de-fining a bomb, while avoiding obstacles' head.

Directed at Greville Marx,

The Paces. Ascent's character, it is a calendar, under tape — and computer program.

director Mel Crowder lived up to Ascent's image to software's jobs.

He was offering a Christmas deal which would suit many at all. The £1 package consists of a C30 black case, a calendar featuring Ascent's *Paces* character plus an audio tape of *The Paces* character's life.

Recorded by Mel Crowder, the tracks include *Computer Alphabet* by Lord, the office party "A Country Music" by Lady Jane Smith and the Red Tunes "I" and the extended final version of *Paces* (the record recorded by leading South American composers). Sound effects include a *Stomach* and *Conscience*.

New software from Ascent's machine *Moira* from the *Black* £15, Spectrum) based on the *Paces* character's car and with a some called *Leader of the Free* on the same tape, and *Yellow* £15 which has *Dragon* and *Spectrum* versions on the same cassette.

*Fantasy* and *Worries* launched up to other accounts.

*Jeopardy* (Cassidy £15.95, Spectrum) and *Jeopardy* (Cassidy £15.95, Spectrum) which follow: *Fantasy*'s *Portrait*

And *Android* £1 Spectrum, £5.95) is the follow-up by *Vortex* of *Android*.

Edinburgh's operation *Widge* brought out a new spring are tape designed to help children of five to six with logic and reasoning. *Widge* at £5.95 for the Spectrum, *The Hammy-Dumpy Mystery*, and *Who Killed Cock Robin?* was written by primary school deputy head Caroline Asher.

Leslie Harrison, writer of *Flapper* (Spectrum, £6.95) and proprietor of *Les Funnies*, brought about *Flapper* Mary Ann, 11, and 14-year-old Caroline to help out on the novel. Mary Ann had helped father in the early days by typing in his letters.

Commenting on his son, Mr Harrison, a 15-year-old brother, said "With all the white-light around, why doesn't there be some white-light?"

Waggoner and *Red* £15.95, Spectrum) are the new version of *Nubula* (£6.95, Spectrum) and a strategy game of space conquest.

*Red* (£5.95, Spectrum) will help you win at *Blackjack* when you play with and cards, character Chris Mountain, proprietor of *Chippewick*, Mr

Mountain, who developed the program on an Electron 1, and you learn to you watch the computer play. To bring some style to his novel, he was dressed in a literary jacket.

Richard Shepherd, adventure specialist, showed at last, *Urban Legend* (£4.95, Spectrum), set in a town called *Scotchgate* — "a town to laugh remember *Scotchgate* *Red*, *Legend*."

Primmer showed the first in a series of six tapes written by primary school teachers to encourage creative writing. *Spacewalk* (Spectrum, £4.95), presents an adventure after a space crash — winning medals at random. Primmer offers a marking and assessment service of written work for £5.50 per program.

### Where to find them

It includes a number of addresses in the table.

David North Midlands Distributors of *Excavator*, *Jeopardy* and *Android*, Leamington, Warwick.

PAE, 17 Leamington Rd, Leamington, Warwick CV32 0PL.

North of Gloucester - Cheltenham, *Excavator* (Spectrum, £4.95) £10.95, *Jeopardy* (Spectrum, £4.95) £10.95, *Android* (Spectrum, £4.95) £10.95, *Jeopardy* (Spectrum, £4.95) £10.95, *Android* (Spectrum, £4.95) £10.95.

David Bannister, J. Computer Art, *Excavator*, *Jeopardy* (Spectrum, £4.95) £10.95.

Midland, 1. *Excavator* (Spectrum, £4.95) £10.95, *Jeopardy* (Spectrum, £4.95) £10.95, *Android* (Spectrum, £4.95) £10.95.

## SCOPE

Computer Graphics Language

- ★ A VERY POWERFUL, TRUE MULTITASK LANGUAGE
- ★ AS FAST AS MACHINE CODE
- ★ SIMPLER THAN BASIC

Write Machine Code in a fraction of the time currently required

SCOPE is available from most good quality dealers and selected branches of

**WHSMITH**

By buying 10 now you can enjoy 10% off your next purchase. Contact your nearest branch for details.

### TECHNICAL DETAILS

SCOPE is a fully structured, multitask language specifically for writing graphics and animation software. Being fully compatible with TOS/SC it is ideal for writing both text and adventure style games. Additionally, with SCOPE you can do high memory. It can be used as an assembler with SCOPE would be a plain language programmer. Therefore no knowledge of machine code is required. The language is extremely easy to learn, write and use. It is also very powerful when it comes to providing many features not available from BASIC.

### Everest Ascent

Conquer the world's highest peaks in defiance of all the obstacles, men and nature can throw at you! Survive real inches, cross bottomless crevasses, cope with icy wind storms — but don't run out of supply! **£4.50**

## Don't let that alien land!

How long can you keep off the marauding alien hordes who are trying to take over your laser base? You'll need a joystick to play

Stephen Harris's  
Space Alien game for the  
unexpanded TI-99/4A

The alien has landed — a scene from Space

What's this? Your system is telling you there's an alien landing craft approaching your base — and your experience tells you that it isn't planning a social visit.

You'll better move quickly to make sure that craft doesn't get control of the base. Use your joystick to move the base from side to side, and try to shoot the alien down with your missiles. Or don't. Be too trigger happy, or you'll run out of missiles, and the game'll be over.

You get 10 points for each hit — and a new alien will start to make its way toward your base. Howling into your lights thereafter?

### Main variables

- GM: jumps (unit)
- A: milliseconds with joystick
- F: milliseconds if missile hasn't moved
- L1: frequency of joystick movement

### How it works

99-100 print out instructions  
110-119 define characters and colors  
120-129 plot base  
130-140 move alien  
150-159 move and fire  
160-169 missile hit  
170-179 move right  
180-189 point laser  
190-199 out of missiles  
1000-1009 print out score  
1010-1019 out of game

### Things we can't explain

CALL CLEAR clears the screen  
CALL INHIBIT (A,B,C) A = rows, B = columns, C = color  
CALL ACCT (A,B,C,D) A = rows, B = columns, C = color  
CALL WPM (A,B,C,D) A = length of row, B = frequency, C = value  
CALL MATH (A,B,C,D) A = example keyboarding, B = key, C = V, D = V - milliseconds if key is pressed, D = milliseconds if key is pressed

**COMPLETE PACKAGE  
FOR SPECTRUM  
OR BBC MICRO**

# Add on the printer that adds up to less than £230

A Seikosha GP100A Printer. Plus the correct interface\* cable and software for either a Spectrum or BBC Micro. All at a price that adds up to just £229.95 inc. VAT.

For a superb combination of economy and reliability, this package is unbeatable.

## Full graphics capability

The Seikosha GP100A uses standard weight paper, and prints in an 80 column dot matrix format. Printing speed is 50 characters a second (240 x 7 dots/sec).

The GP100A comes with a full graphics capability.

## Apply immediately

You can buy the Seikosha GP100A Printer at any of our dealers throughout the country. For the address of the one nearest you, phone this number without delay.

**0934 419914**

\*License required interface, supplied as optional add-on unit only, is available for an additional £100.00. Please apply.

# Plug in and go places

You can find yourself in some very funny places when you set out on a computer adventure. Before you go, read all about them in our reviewers' reports

## 2003 - A Space Oddity 48K Spectrum £4.95

df/Tromer, Ltd & John Hall  
(publishers) Exeter, Devon  
Madden, Essex

Most will find the name of this program because it recently hit an oddity

So in most ways, you have to find your way back to space via a series of adventures which seem to have no point.

There are three possible cues to any scene, allowing it to shift itself north, south, east, west, up or down. These cues can be either a door, space ship, space warp, ladder, or space shield.

At some of the main items are challenges to be met with a choice of fighting with either a laser or a special shield. Otherwise, all you can

do is explore, then you can win. Treatment is funny about in various instances, and you either have to fight to get in or get out for the wrong. All the cues are drawn for you, and there is one screen I've seen that you will play. Drawing the time or space war, which is using a lot of force, and pressing it will ensure that they are drawn on more. There is a lot of that that is a lot of

I thought "Look for a door" into a good idea, but it was too much for the computer, so the game ended with a crash. "Look for door" was accepted.

I managed to solve the game after about a few days, but I was over a couple of days. There are a lot of things to do in an adventure game. I like this to mean that it's a lot of things to do in a game to beat. The challenge is that I can't say it's a lot.

I found the game quite enjoyable, though once solved, it's a bit of a waste of time. The few of the game would be a lot of

## The Island 48K Spectrum £5.95

Virgin Games, 44-45 Farnham Road, London W11 3AA

An adventure game that is a different from most. It's a lot of fun, but there is a complex story that is part of the fun. It is not just a game, it's a game with a story. And, yes, this is a game with a story, but very different from the others.

The adventure is an old one, but it's a game with a story. It's a game with a story, but it's a game with a story. It's a game with a story, but it's a game with a story.

When you start your adventure, this appears to be an old one. It's a game with a story, but it's a game with a story. It's a game with a story, but it's a game with a story.

action sequence work like an action game. But, and you are not — you are not. The game is a game with a story, but it's a game with a story. It's a game with a story, but it's a game with a story.

There is, however, a game. In the original text adventure, the game is a game with a story. It's a game with a story, but it's a game with a story. It's a game with a story, but it's a game with a story.

On the island, there is a "winning" path and you will find yourself dead very quickly. It's a game with a story, but it's a game with a story.

## ONE MAN'S VIEW

# How you can spot the cowboys

With home computers being as popular as they are today, more and more software companies are setting up and marketing their programs.

In the run up to Christmas many of these will be sold to both novices and experts in the field.

About half of the buyers of these programs will not be totally satisfied with what they get.

The fact of the matter is that there are still a lot of cowboys lurking behind glossy cassette jewel covers and flashy advertisements.

So how do you tell the difference between a high-quality software company and one that is only after your hard earned cash?

The best way is to see the software working before you buy it. Unfortunately this is not always possible so you may have to judge it by other means.

The second best way is to buy from companies who print screen displays on their adverts and/or cassette jewel covers.

Companies who do this obviously want you to see the high quality of their programs — they don't need an artist to paint you a picture of what the game could, but will not, be like.

The third way of assessing programs is to read software reviews, such as the ones in this magazine. They will tell you the theme, quality, value for money and faults of the program. They are of course dependent on the reviewer's taste in programs, but even so will be given a fair review.

When looking around at programs you should expect top quality software.

Games should be of arcade quality. Expect them to be written in machine code, make full use of graphics and sound and exploit your computer's abilities. Visual logic games should be well presented and easy to use.

Educational software should be easily understood and useful, not a computerised gimmick. It should be able to help you learn about a specific subject easily.

Utility and business packages should make full use of your computer system. Ease of use and a neat output is essential in this type of application.

If there is a similar but better program available at a higher price then I would advise you to consider the better one — there's nothing worse than having to go about things the long way when there is an easy short cut available.

Software standards will only be as high as you set them. If you insist on the best, then the rubbish will dwindle away and more high quality software will be available at prices we can all afford.

## The puzzle a computer

Allen present the ultimate in word puzzles – 50 integrated crosswords – which form a cube

All locations of the 3 dimensional puzzle are contained in the computer programme and you can complete any part you wish using the display on your TV and computer keyboard. Understanding all the relationships between the

crosswords is not possible without the computer but as you proceed you will discover new routes to help achieve the solution.

Features: Solution Store, Instant Display, Anagram Function, Character Location in memory.

This is a tough puzzle with a degree of difficulty – it's the ultimate but it's not impossible. Full instructions are included with the programme.

## First Steps with the Mr. Men £2K BBC £9.95

Microsoft, Hothorn Circus, London EC1P 1DG

Using computers with young children is not as easy as it might seem — it is very much dependent on the quality of software that is available.

This package is one that works — it's a well thought out and designed set of programs which will teach many children in the Age to eight age group.

The package contains five programs which are graded in difficulty.

The first, Mr. Gumbly's Ice Cream Hunt, is enough to occupy an average five-year-old child for an hour and a half in regular play.

Mr. Billy's Hot Cheese is the obvious program for the younger because it takes the time long to look. The package also takes the time to let the child learn about shapes and colors in the process.

The final two games feature Mr. Piggopol, who has two other interesting characters in the program as well. It is made more interesting by the way the child is taught to use the mouse.

The package also contains a 24-page full colour book of simple language and pictures, and a set of the children's game plus a descriptive key template.

## Pathfinder Spectrum £5.95

Widge Software, 48 Dorken Road, London N2 9JY

Before setting up anything else, make sure children need to be able to write and print out text.

hard copy.

Widge's Pathfinder is a real learning experience for the school and primary age children.

In a series of five well presented screen games, the child learns to write and print out text. The games are designed to be used in a group or individually, and the child can learn to write and print out text in a variety of ways.

## Fun To Learn 52K BBC £9.95

Widge Software, 48 Dorken Road, London N2 9JY

This set of programs is written by a teacher and used in the classroom to teach the child to write and print out text.

These are a simple, readable screen which should be used to teach the child to write and print out text in a variety of ways.

The first program is a simple screen which shows the child how to write and print out text. The child can learn to write and print out text in a variety of ways.

Calculation is a simple thing to teach a child to do. The child can learn to write and print out text in a variety of ways.

Calculation is a simple thing to teach a child to do. The child can learn to write and print out text in a variety of ways.

## School Maze Dragon £10.95

Dragon, Data, Ready Industrial, London, Weybridge, Peterborough

Some software houses seem to be making money by producing programs for children in a few hours, and then selling them at a high price. This is not the case with Dragon.

This is a prime example of the phenomenon — a fairly short and unimpressive BASIC program which is just what it should have been developed much further before being released onto the public.

It is a shame that the game is a few short hours old, and the program is not as good as it could be.

A program of this kind is not as good as it could be, and the program is not as good as it could be.

At some point you will see the screen turn to black, and the text will say — it is an apparent ending, and the program is not as good as it could be.

At the end of the game you will see the screen turn to black, and the text will say — it is an apparent ending, and the program is not as good as it could be.

At the end of the game you will see the screen turn to black, and the text will say — it is an apparent ending, and the program is not as good as it could be.

The screen will turn to black, and the text will say — it is an apparent ending, and the program is not as good as it could be.

The screen will turn to black, and the text will say — it is an apparent ending, and the program is not as good as it could be.

The screen will turn to black, and the text will say — it is an apparent ending, and the program is not as good as it could be.

# There's a terrific draught in here!

Make your Oric quicker on the draw with this program by father-and-daughter team Brian and Sarah Grayson

## Works on one version

Any machine with reasonably high resolution drawing capabilities could run the program with very little modification.

The CIRCLE command, if not supported by your machine's BASIC, will have to be incorporated using the input routines and some test coding.

LSRR DRAW may have to be modified depending on the facility and/or relative position between or to some new key position. Since the Oric cannot draw in a point, these machines with this facility will only require a modification involving a no draw on Y and/or

SAVE will depend on your machine's capability to save point information. If it can be done, the appropriate SAVE command and memory location will need to be inserted.

CIRCLE uses the Oric facility to set foreground or background colours. Most machines have a different facility and this part of the program should incorporate the appropriate command to provide an inverse of the normal display.

Most machines use ASCII codes so the keyboard coding should not present any difficulty. Only the cursor movement keys will have to be checked.

Remember to place the header slightly inside the full screen just to avoid the program missing because a scroll of range.

## How it works

It clears the screen and sets up the initial sequence and instructions (10-20) draws the header, sets the initial cursor position, normal mode, and point measuring (21-26-100 reads the keyboard state and/or the variables of this mode).

266-400 screen of where is already on the screen so that nothing is lost as the cursor flashes 400-450 sets and instructions 450-1000 sets and ends the program instructions.

This program enables you to draw lines and circles in the basic mode using only the cursor control keys and various assigned single key codes.

No prior plotting on a paper is required in the Oric or is used to "compose" drawn on the screen.

The assigned keys are self explanatory and detailed in the program they are:

P to fix a point so which lines may be drawn from any other cursor position.

C to draw a circle, you must assign a radius when requested.

L to draw a line to the point previously "fixed".

D to enter the define mode when every subsequent action is drawn in the background colour (wipes out a previous foreground feature).

N to return to the normal mode.

Q returns to the macro mode but, however, all your work will be lost.

W to save the drawing on the screen. Position a blank piece of tape and start to record before pressing S.

Cursor movement is achieved with the arrow keys, and the distance moved may be varied by 1,2,3 or 10 pixels by pressing 1,2,3,5 in any one line. This control will be achieved by using 5 or 10 until you are near to your desired position, then changing 1 or 2 for final positioning.

“...And whoever receives the support will be made her opponent to the throne of Cadiz,” Sigurd, his great royal majesty, Count Dr. and member of the

The Herald returned and reported his findings, assigning the mission to the rest of his

Racine: These all leave the same, he reflected, yet few remembered the Underground Partisans of the 1940s or the height of its

The Cossacks had often spoken of it, as the dawn watch of May was the fittest. Some say 10,000 warriors breaching the upper defenses, and 120 men and women as a first attempt to secure the left bank beyond.

"But war was the victory. I won the war. Radio was turned off and broken, and the entrance sealed with metal beams. In that silence with hands in waist

The old man would shake his head. "Then tell forces outside the palace, and removed the scepter of rule, without which king is powerless. And then to find the entrance to Peking, unguarded, and return to be sure. That I, who, you, young man, declare the challenge to the world."

Again the ill-at-ease look would settle back and forth: "But I'm off here outside today yet live, and none will dare the entrance. The memory of error life has driven upon the land."

The Herald urged its readers not, however, to forget the "dead ship" and "soldiers not awarded."

[illegible]

This award is so big that I had to split it into two programs. Together they occupy over 300 acres

In order for the game to work, the first program should be called "C:\MSDOS\IBAS" and the second "IBAS.DLL".

The previous version is not dangerous, but convenient to construct is a simple matter. First, all references to "NAME.DAT" should be removed, as should all XRD programs.

Change all occurrences of "B" to "T". Lastly, mark a page as read at the top of MAIL B to del. for the element's character name.

In order to answer them, the game has been made strategically complex, although it is hoped that this could be a simple matter

When receiving the code for the first time, call this a New Character. Later, you can have your replies do not require you to press return. I jump a line up on your gold screen, so you wander around the screen easily.

to pay much to anyone excepted any kind of work or second paying for something, type a zero. When you are well enough, returned, use

## The sceptre of Cadarian

Deep underground, evil things await those foolhardy enough to venture into Radro. Marc Freebury's adventure game was written for an Atari 800 with discs, but you can easily convert it to cassette.

1. **Identify the main idea or thesis statement.** This is the central point the author is trying to convey.

option 3 from the courtyard to  
and on the main

Change the measurement, you can remove a previously saved level by selling the down-station, and giving the same the level was saved under (until right-hand line worked).

Once you descend the stairs, you will be given a three-dimensional view of the road ahead. At this stage it is a good idea to start drawing a map so that you can find your way back to the ground later.

Maravenna is the key: W, A and D— use A and D for turning on the gun and W to advance position.

The mouse plotter is working in binary mode, and its scale has no slightest doubts. If two consecutive "blocks" of the 20 by 20 grid are open a year left or right, a lightbulb will be changed. These are really spaced-out demand projections, a useful exercise for the

Finally, you'll encounter unloading. This is a randomly distributed and is not carried by monomers, so it drops further the rate of release.

Speaking of numbers, number is also likely. If you're negative, they mean, straightforward, and can easily think you're proud of you are foolhardy, for brave as you would have it enough to stand your ground.

There are five standard systems. First, back as you mount with your head turned away from the

There is an option to test one of the four wells available. These are only for use if you have enough good cells, gained from another source.

The first spell is 'sleep'. It will cause one moment to become theory, allowing you one free session.

First v. Football (among the youngest in the study, all age 10-11).

Third is Back To Black. The broken-out rugged power and disorganized raw black of the main around you. Naturally this display of power will cause the masters to be temporarily upset.

Level: n. Teleport, which  
enables a man and a woman

Death is inevitable, ultimately it's just the pain, reaching, you die. Looking out of the cold window, all day, the moon.

**Expensive place, as, gained for money, asked, and when enough have earned, year chosen? In-1 will increase, as will the upper limit of his his point. You're not, an estimate will be made, and find a way to do it.**

That is a basic outline of the game. Of course, there are things left unexplained but we'll find those out as they come.

*Inside...*

*Setting new standards in  
educational software with  
Sinclair-Macmillan*

*Plus six other learning programs*

## TODAY, LEARNING IS A NEW GAME

Subsidised microcomputers are now commonplace as teaching aids for the very young and the ZX Spectrum is prominent amongst those more at ease in schools.

In the relatively short time that the Spectrum has been at work in the classroom, two questions have been answered: Yes, with the right software, the micro can and does teach effectively and thoroughly (and gives teachers more time to devote to individual pupils); Yes, young children have little of working rapidly and successfully, with a screen and keyboard, on even quite complex subjects.

In this Sinclair Special we reveal a range of educational software specifically designed to make full use of these advantages. The programs produced by Sinclair in collaboration with Macmillan Education are fascinating. They deal imaginatively and most effectively with early reading skills and take a truly refreshing approach to basic science.

In the Blackboard range we've programs which bring a light-hearted clarity to the tricky matters of spelling and punctuation.

These programs are designed for use both at home and in the classroom. Each program is accompanied by full documentation which gives parents helpful advice and guidance on the educational objectives.

The programs covered on these pages represent only a fraction of the full and fast-growing list of Spectrum software. Be assured we'll keep you in touch with new developments as they happen.

## NEW WAYS TO LEARN WITH THE ZX SPECTRUM™

### Programs from Blackboard Software

The new range of educational programs from Blackboard Software makes learning an enjoyable process by involving the child in a game which teaches as it entertains.

Each program has a step-by-step example written and voice-coded answers after a number of attempts. Vocabulary changes can be made, allowing each program to keep pace with the child's development. This flexibility can also be used in the classroom to cater for children of differing ability.

The interactive and colourful games which follow the successful completion of each group of sentences provide useful practice in letter recognition and increase familiarity with the Spectrum keyboard.

All programs are written for the 48K RAM Spectrum.

#### Alphabet Games

Three games of letter recognition (using either upper or lower case) to help children learn the alphabet and find their way round the computer keyboard.

**Alphabet** — The full alphabet is displayed, along with a second, incomplete version. The child must fill in the missing letters.

**Random Walk** — Press the letter key that is displayed on the gun to destroy the rats which have invaded the garden.

**Insects** — Stop little green men from landing on Earth by pressing the appropriate letter.

#### Early Punctuation

While an animated matchstick man marches above displayed sentences a child must decide which punctuation mark is missing and where to insert it. At the touch of a key the matchstick man drops the mark into place. After successful completion of every sentence in the exercises, light relief comes in the form of a bottle-rocketing game!

#### The Apoptosis

As each sentence is displayed, a bird appears with a worm in its beak. The keyboard is used to move the bird and drop the worm into the correct place for the apostrophe. When ten sentences have been corrected the Grim-Grim is displayed. Press the correct character to change the grim into a butterfly. Before it launches through a flower!

#### Capital Letters

A program to teach the use of capital letters. Sentences incorporating proper nouns and sentences without opening words are displayed. The child must then select by pointing an animated figure to the appropriate letter.

For each correct answer an apple grows on a tree. After ten correct answers the child is able to recognise letters and using the Spectrum keyboard is needed to save the apples as they fall to the ground.

#### Speech Marks

A comprehensive program including sentences with one or two sets of speech marks (inverted commas) and exercises in both direct and reported speech.

Using the Spectrum keyboard a cursor is used to guide speech marks to the correct position. The program offers three levels of difficulty with full examples for each section. Grim-Max the mouse, through a maze, after the successful completion of five sentences from each section, but beware of Persian cats!

#### Castle Spellings

A spelling game with ten levels of vocabulary including words with silent final letters, double letters and other difficult words. The Princess has been captured and carried off to Castle Spellings. Helped by ten soldiers the child can attempt a rescue by giving the right answers. Part of a siege tower is built for each correctly spelt word. Mistakes are costly — the evil wizard appears as a vampire bat, turning the men into frogs, butterflies and bats!

When ten words are spelt correctly the rescue begins and the wizard takes flight.

# SINCLAIR + MACMILLAN: A NEW DIMENSION IN EDUCATIONAL PROGRAMS

Sinclair have joined forces with Macmillan Education to produce a completely new and different range of educational software. The results so far can be seen in these exceptional programs.

The Learn to Read series is derived from Macmillan Education's best-selling primary school reading scheme, *Gay Way*. It offers a unique opportunity for parents and

teachers to participate in the child's first experience in reading.

Macmillan Education's Science Horizons is one of Britain's most successful school science schemes. Each program concentrates on key scientific ideas and, through simulation of real life, makes the learning process entertaining and enjoyable.

## Learn to Read 1

Learn to Read 1 is designed for children who are just beginning to read. It is in four parts each of which develops skills central to the reading process — letter recognition, sight vocabulary, early spelling and memory. The program is full of colour and fun and children will enjoy learning to read as they visit the animal characters — first the dog, then the cat and their friends.

## Learn to Read 2

Learn to Read 2 extends the fundamental reading skills produced in the first program, as well as encouraging logical thinking. The child's vocabulary is gradually built upon new words such as "red", "green", "far", "stop" and "fast" are introduced. In addition, Learn to Read 2 features an attractive "reward" system enabling children to see their achievements grow.

## Learn to Read 3

Learn to Read 3 builds on the child's progress so far, so that he or she can gain the confidence to move on through the complex reading process. Learn to Read 3 features four different activities, all of which are colourful and lively. Further vocabulary is introduced until the child is reading more than 30 words.

## Learn to Read 4

Learn to Read 4 is the alphabet program in the Learn to Read series.

Using various stimulating activities the program gives the child plenty of practice in working with the alphabet — matching real letters to words and pictures — and spelling missing letters. These exercises build tenaciously with simple sequences within the alphabet.

## Learn to Read 5

Learn to Read 5 teaches positional language — often difficult to understand and remember — by using words and phrases such as "behind" and "in front of", "inside" and "outside".

The program first demonstrates the meanings of the words using clear pictures. It then tests the child's understanding of the words in two lively games.

## Cargo

Set out around the world. Choose your ports of call — New York, Tokyo, Berlin, Helsinki — then the real challenge begins! You must reach your destinations safely, weathering storms on the way. But first, load your cargo — using all your knowledge and skill. Your loading can mean loading and unloading your ship, if not your life. Is it easy or stark?

## Glider

Get a glider pilot! The glider models real-life gliding conditions so that you can learn through experience. As the pilot you must consider the time of day, the amount of cloud cover and the kind of terrain below you in order to find the up-currents of air that will keep you airborne. Try to fly as far as possible and, when you are high enough, re-ignite your way back to your home field and land safely — if you can.

## Survival

Discover what it's like to be an animal in the wild! It's like stalking your prey, escaping human hunters. Or be a hawk, mouse or even a butterfly, searching for food and avoiding predators.

Survival explores the natural world and brings to life hazards that different creatures must face in their struggle to stay alive.

## Magnets

With an army of small magnets you set out to conquer the powerful supermagnets of your opponent. You have one weapon — your forces of magnets attract and repel.

The strategy is simple: attract smaller magnets to build strength to repel the supermagnet. When cornered, put them your pawns on your enemy and see what happens!

# ZX INTERFACE 2 THE NEW ROM CARTRIDGE AND JOYSTICK INTERFACE

Now available in kit form

**Loads programs instantly  
Takes two joysticks  
Just plug-in and play**

The ZX Interface 2 is the latest new peripheral for the ZX Spectrum system. It enables you to use new ZX ROM cartridge software - plug-in programs that load instantly. There are ten terrific games already available on cartridge. ZX Interface 2 also allows you to use

one or two standard joysticks without the need for separate special interfaces.

To use new ZX ROM Cartridge programs, just connect Interface 2 to the rear of your Spectrum or Interface 1 and plug in the cartridge of your choice. Switch on and the program is there loaded, ready to run!

You can use any joystick that has a 9-way D plug. Use one or two of them for extra fun with suitable ZX ROM cartridge or Sinclair cassette programs - or with dozens of other Spectrum programs.

## ZX MICRODRIVE/ ZX INTERFACE 1

The ZX Microdrive System is unique. This compact, expandable add-on system provides high-speed access to massive data storage. With just one Microdrive and a ZX Interface 1 you'll have at least 85K bytes of storage, the ability to LOAD and SAVE in a matter of seconds, the beginnings of a local area network of up to 64 Spectrums and a built-in RS232 interface. The cost? Less than £80.

### How to get Zx Microdrive and Zx Interface 1

Spectrum owners who bought direct from us by mail order have been sent full details. Order forms are being mailed in strict rotation. If you haven't yet received your order form please bear with us. We're making good progress in meeting the huge demand.

If you didn't buy your Spectrum by mail order, send us the form at the bottom of this page and we'll add your name to the mailing list.

### How to order

Complete the appropriate sections on the order form below. Note that there is no postage or packing to pay on software purchases. Orders may be sent PREP087 (no stamp needed). Credit card holders may order by phone, calling 01-255 0200, 24 hours a day. Please allow 25 days for delivery.

© Sinclair, Zx Spectrum, Zx Microdrive, Zx, Zx Interface are trade marks of Sinclair Research Ltd.
